

NGUYỄN TẤN ĐẠT

Backend student · Software Engineering · UIT — VNU-HCM

github.com/Dat-se40 leetcode.com/u/Dat-se40 facebook.com/1590laupaylak

PROFILE

Software Engineering student at the University of Information Technology (VNU-HCM), cohort 2024–2028. I work on backend system architecture, concurrency, and event-driven programming. Basic CRUD is not the interesting part — I prefer design patterns, containerization, and the places a system breaks before the interface loads. Currently focused on Spring Boot, microservices, and clean code. Desktop (WPF), games (Unity), and Java APIs are where the hours go.

EDUCATION

University of Information Technology — VNU-HCM

2024 — 2028

Bachelor of Software Engineering

Currently enrolled, year 2. Coursework and personal work center on backend services, relational modeling, and networked applications.

SELECTED WORK

Royal Blueberry Dictionary

Desktop Application · 2026

Client-server English dictionary. WPF client, Spring Boot backend, JWT and Google OAuth2, SQL relational model with dependency injection, semantic search, Docker. Migrated from a NoSQL JSON store to a structured SQL design.

Bommy

Multiplayer Game · 2026

Unity 6 networked bomber game. Led a 4-person team. Peer-to-peer lobby architecture for matchmaking, destructible environments, and synchronized game state — concurrency without a dedicated server.

Mosquizto

Android + Backend · 2026

Flashcard learning platform. Android client, Spring Boot, PostgreSQL, Redis, Meilisearch (chosen over Elasticsearch to keep memory down), WebSocket social features, Docker.

Genesis

2D Pixel RPG · 2026

UIT freshman-survival RPG / visual novel. Explore campus, collect clues, solve IT puzzles. Double2T team. Second Place, DEVO game category.

STACK

LANGUAGES

Java, C#, C++, PostgreSQL

BACKEND & TOOLS

Spring, .NET / WPF, Node.js, MongoDB, Docker, Git, Postman, LaTeX

OTHER

Unity, Android, REST API design

LEARNING NOW

Software architecture, clean code, microservices

AWARDS

DEVO — 20th Anniversary SE Dev Challenge

2026

Second Place — Game Category · Genesis / Double2T

AVAILABILITY

Open to backend internships — Java or .NET. Prefer a real problem over a ten-page job description. References and the official UIT transcript are available from the portfolio Reference section.
